

## Design and quality

Working with architects Barton Willmore, Ruskin Homes has created this stylish development of sixteen two bedroom apartments with a lift to all floors. The apartments are contained in a four-storey building with a landscaped surround and private parking for fourteen cars accessed from Tudor Gardens.

As a traditional builder Ruskin Homes has given careful consideration to the appearance of the building designing it to be sympathetic to the surrounding area. The use of rusticated render on the ground floor and stone lintels, sills and string courses add character and depth to the brick finished elevations. The use of modern, low maintenance materials ensure these are homes built to last.

## Site Plan
